

**WonderFill** is a premium round sand infill that naturally improves drainage in your syththetic grass. High-quality coating with extra deep color, makes WonderFill stand out from other infill products on the market. WonderFill coating naturally encapsulates dust, with ZOE infused coating helping control the growth of mold, mildew, and algae.

Zinc Omadine ZOE Antimicrobial coated WonderFill helps prevents the growth of bacteria is cost-effective, high-quality turf protection that consistently keeps synthetic grass blade quality turf protection and durability Consistently keeps your synthetic grass blades standing straight and upright.

**High Quality Acrylic Coating:**

WonderFill is coated with premium vinyl coating to encapsulate dust. It is designed for durability and has been tested to withstand heavy traffic and pet areas. WonderFill is ideal for lawns, commercial projects, pet areas, playgrounds, sport applications, and putting greens. The vinyl coating is less abrasive than other coatings.

**Coated with Lonza Microbial Control:**

The vinyl coating includes Zinc Omadine, trademarked as Zoe Antimicrobial.

**This product is designed to reduce or prevent the growth of:**

- Staphylococcus Aureus (Bacteria)
- Aspergillus niger (Fungi)
- Candida Albicans (Yeast)
- E. coli (Bacteria)

**Coated with Zoe, Zinc, Pyrithione:**

This reduces odor caused by urine. Zoe kills off the organism that causes additional odor from urine. Zoe causes proteus bacterium to deactivate and become unable to metabolize urea and thus, inhibits the formation of ammonia.

**No Respiratory Dust:**

The high-quality vinyl coating on the WonderFill encapsulates the free radical silica dust. WonderFill has been tested extensively and found to have very low volume.
